Bethlehem Steel Company is said to be contemplating a large bond issue, of per haps \$50,000,000. It is believes that the new issue, if it materializes, will be for financing new construction work. Present funded debt of the company is \$60,790,000, and including bonds of all its subsidiaries, the 225 total debt is \$81,469,000.

It is understood that the annual statement of the Baldwin Locomotive Company will show about \$1,000,000 surplus after preferred dividends. This would be equivalent to about 3614 3656 52 by ser cent on the common stock. This would indicate that the company's war contracts have not been

SOUTHERN MAKES CHANGES

Lincoln Green Promoted To Be Vice President.

A number of important changes in officers of the Southern Railway Company, including the promotion of Lincoin Green, whose headquarters are here, to the position of vice president tion of forests in the exhibition room in charge of traffic of the Eastern at the Willard. Bad treatment of a lines, are announced. Mr. Green has forest means cutting down promised been stationed in Washington since ously trees of every sort and descrip 1904, when he was made freight traffic manager.

Other changes included the retirement of J. M. Culp, for many years vice president of the Southern in charge of the traffic department, Mr. charge of the trante department, ar-fulp's retirement was at his own re-quest, and is due to ill health. He quest, and is due to ill health. He will remain with the road in an ad-visory capacity. T. C. Powell, vice president, at Cincinneti, was pro-moted to vice president in charge of traffic on Western lines. E. H. Coap. man, formerly vice president and gen-eral manager, is promoted to vice president in charge of operation of all lines. G. R. Loyall, formerly general superintendent of the middle district, is promoted to be assistant vice presi-dent, with jurisdiction on all lines under Mr. Cospman. W. N. Foreacre. formerly general superintendent the Eastern district, is promoted to be general manager of the lines east with headquarters at Charlotte. Horace Baker, formerly general man ager of the Cincinnati, New Orleans and Texas-Pacific railway and the Alabama Great Southern, is promoted to general manager of the lines West, For purposes of administration the company has designated the Circla nati, New Orleans and Texas Pacific. the Alabama Great Southern, the New Orleans and Northwestern and the Northern Alabama, as "lines East" and "lines West."

RUBE MARQUARD HERE

Celebrated Ball Player Guest of Roland S. Robbins Today. Rube Marquard, Brooklyn's cele-

brated ball player, is a Washington visitor today. This morning Mr. Marquard was the This morning Mr. Marquard was the guest of Roland S. Robbins, manager of the B. F. Keith Theater, at the Columbia Country Club, where they made the rounds of the famous golf Together with Mr. Marquard Billy

Gaxton and two members of the vaudeville team of Harris and Marion, were Robbins' guests. After their game Mr. Robbins re-turned to town to chaperone a company of juvenile California musicians on a sight seeing tour of the city. Mr. Marquard will return to New York tonight. His wife, who is one of the headliners at Keith's this week, is know nto theater-goers as "Blos som Seeley."

EXPECT BIG THINGS IN FORESTRY WORK

Over Four Hundred Experts in Annual Session at the New Willard.

Meeting at the Willard Hotel to day there is a group of men who have come from all over the United States. Many are tanned by the sun and wind, hard-muscled and athletic: others are keen business men, sharpfeatured and keen-eyed. All have come together for one purpose-to discuss plans whereby the conserva-

States may become more extended. For thirty-seven years the Ameri can Forestry Association has been holding annual meetings. It began holding annual meetings. It began fire will lay waste to hundreds of with conventions which brought to square miles of virgin forest. Uncle gether a few far sighted men was had begun to wonder at the waste in American forests and become anxious over the ending toward which it was leading.

More Than 400 Present.

lard, and some twenty-five or so came all the way from Canada. They have made vast progress toward creating legislation which conserves the forests of Uncle Sam, and the outlook was bright for a country which might ultimately have laws equal to those of Germany, the leading country in this respect toward the careful conservation of her forests.

Then arose a fresh problem—a problem these men are considering today.

Just Shook Heads.

Some years ago, when the now dreaded cotton boll weevil first made its appearance in the cotton crops of the South, farmers solemnly shook their heads as they examined the blackened result of the boll's work on their fields of cotton.

Shaking their heads was about all they did until the ravages of the boll weevil threatened to play complete havoc with the South's greatest asset. Then they woke pu and the Depart ment of Agriculture, re-enforced by the farmers, now wholeheartedly alarmed and anxious to assist, began fighting the pest. They haven't found a remedy yet, but they know much more about the boll weevil than they did before.

New Fungus Disease.

It is to avoid just such a state of delayed precaution that the foresters are meeting today. Some years ago a new fungus disease, imported from Europe, began 'attacking the white pines in this country. Now the disease, unless stopped, threatens to destroy more than \$300,000,000 worth of

forestry in the United States.

In the anteroom of the meeting chamber in the New Willard are exhibits showing the work of this fungus. The disease starts as a sort of cancer under the bark, pushes it up, and finally kills the limb or tree

No remedy, except the precaution of destroying the plants on which the disease seems to feed, has been found.

Expect Preventive.

But with the members of the American Forestry Association, assisted by Uncle Sam, fighting for all they are worth against the disease before it goes beyond the power of man to stop it, every indication is good for the early discovery of a proper preven-

Conservation of forests means to the majority of people, keeping many trees from being cut down for umber and wood.

It does mean that, but when it is taken into consideration that cloth. insulation, paper, and even paving plocks, are made from the by-products of trees, the safeguarding of Uncle Sam's trees meant much more.

Models Show Bffects.

There are small models which show the affect of good and bad conservaously trees of every sort and description without regard to the trees which are too young to molest, or the destruction of disease infected and

badly formed trees.

The result is the death in a few years of a forest which with proper care would give its yield of lumber

JOHN S. M. ZIMMERMANN, Director March, "Arms of America". Pryor Overture, "The King Pin". Taylor (Popular Song Medley) Morceau, "The Dream Melody"

Valse hesitation, "Love Sighs" Wendling Fox trot, "Oh How She Could Yacki, Hacki, Wicki, Wacki, Woo"......Von Tilzer Finale, "The Merry Whirl"

"The Star Spangled Banner."

annually and improve with each year's Then, in the West, where a forest

Sam has taken many precautions. Forest Lighthouses.

He has erected fowers, much like lighthouse towers, from which constant watch is kept by trained men Today there are more than 400 of the forest, great wide trails have been these delegates meeting at the Willer the forest, great wide trails have been which to increase the ambulance force in this connection. Miss de Wolfe constructed. These would, a few years in this connection. Miss de Wolfe expressed the wish that ambulance force in the connection in the United ago, appear ridiculous expenditures, but now they have become well-known means to stop if possible the onrush of forest fire, and, incidentally, to provide a good road for forest travel.

Many interesting features of the work being done under the auspices of the American Forestry Association are shown at the exhibits in the Willard, and the growing interest and importance of this work is seen in the fact that the conference this year of the association is more than three times the size of any held in the thirty-seven years of its existence.

OLDEST IN SIXTY YEARS

President First Executive Three Score Since Buchanan.

President Wilson is the oldest Ex ecutive to preside over the destines of the United States for the last sixty years.

When he assumes the oath of office for the second time on Sunday, March 4, he will be sixty years old, a span of years that no President has crossed since the inauguration of Buchanan in 1857.

Incidentally the President is one of the six oldest Executives ever in the White House. Previous to 1861 the men chosen to hold the reins of government generally reached a late period in life before their election. John Adams was sixty-one when in-augurated in 1797; Jackson also was sixty-one when first inaugurated in 1829. Benjamin Harrison was the oldest man ever chosen for the Presi-dency, being sixty-eight at the time of his inauguration in 1841. Taylor was sixty-four and Buchanan sixtyfive, respectively, when they were inaugurated.

Aside from these all Presidents have been younger than Woodrow Wilson when entering the White House. This has been particularly noticeable in the past, fifty years when all Executives have been comparatively young. Theodore Roose velt was the youngest President ever inaugurated in this country, being but forty-two when he took office.

CAPTURED 400,000 GERMANS

Russians Announce Successes During Campaign of 1916.

PETROGRAD, Jan. 19.-Four hundred and twenty thousand German soldiers and 8,770 German officers were captured by Russian troops during the year 1916, according to figures published by the Service Journal today in reviewing Russia's war achievements for the twelve months past.

In addition to these captures of men, Russian forces also took 525 cannon, 1,-661 machine guns, and 421 trench mor tars and nine throwers

SWARTZELL, RHEEM & HENSEY CO.,

as one of the two surgical discoveries most beneficial to mankind, to be found as a result of the present war in Europe. How the use of ambrine has eliminated at least some of the horrors of war was told of yesterday afternoon, before a large audience at the Playhouse. 1814 N street, by Miss Elsie de Wolfe, an American woman well known in literary and theatrical producing circles, who has just come from France.

AMBRINE IS BOON

TO VICTIMS OF WAR

Burn-Healing Wax One of Two

Greatest Medical Discover-

ies of the Age.

Ambrine, a burn healing wax, in-vented fourteen years ago, is ranked

Miss de Wolfe was a nurse at the hospital at Issy, and there saw the necessity for the furtherance of the ambulance work through the installa-tion of movable ambrine laboratories. Each ambulance costs \$1,000, and it is the hope of Miss de Wolfe, and Mrs. Axel Wichfeld, who was in for these fires. Then at intervals in can be raised in this country with would get recognition in the United

tSates.

The ambrine treatment, according to hiss de Wolfe, is an application of a certain wax to the burned wound as soon as possible after the acci-dent. It works without pain to se patient and has healed the most fear ful disfigurements, often without so much as leaving a scar. The longer the wound is left without the treat-

ment, the more difficult it is to heal.

Until the outbreak of the war ambrine, which was discovered fourteen years ago by Dr. Barthe de Sandfort, formerly of the French navy, had received little or no recognition from the medical profession. Its use at the front, however, has demonstrated that it is not only practible but that it is one of the two greatest miracles of surgery discovered during the present
